

I like it when I initiate calling any business. If I need a business' services, I will call them. I do not like for a business to solicit me by my telephone. If I am already doing business with them they have my address and have that option to use the US Postal Service. Please do not let the progress already attained with our telephone privacy law go for naught or digress. Thank you for this opportunity to try to help in your endeavors. Stay steadfast with your efforts in this and like matters.....Sincerely
